

Our Solar System

Read about our solar system

There are 8 planets in our solar system and they go around the Sun. The Sun is very big and hot. Mercury is the closest planet to the Sun. Venus is the brightest planet in the sky. Earth is covered by land and water. We live on Earth. It is our home planet. Mars is red and is the fourth planet from the Sun. Jupiter is the largest planet. Saturn has a lot of rings around it. Uranus has got 27 moons but it is very cold and cloudy. Neptune is made of gas and it is blue.

Match the planet with the information.

- | | |
|------------|------------------------------------|
| 1. Mercury | A) a red planet |
| 2. Venus | B) cold and cloudy |
| 3. Earth | C) made of gas |
| 4. Mars | D) our planet |
| 5. Jupiter | E) the brightest planet in the sky |
| 6. Saturn | F) the closest planet to the Sun |
| 7. Uranus | G) the largest planet |
| 8. Neptune | H) the planet with the rings |

Now, write the names of the planets on the picture below
